Overview

This article shows an example of the code needed to create a **donation thank-you page** that auto-populates the donor's **first name** and **donation amount** to make it more of a personal experience.

 **Tip:** Watch [this video](#) to get up to speed on creating the donation iFrame form. Watch [this video](#) to learn how to create the custom thank-you email that goes out. Read [this article](#) to learn how to customize your donation forms even further with the available URL parameters.

Steps

Here's an example of what your donation form could look like using the javascript code below:

Thank you, Mark, for making the generous contribution of \$100.00. Your donation does make a difference.

...you will need to add a little extra code (*example below*) to the Thank You page.

Thank you,

```
<script language="javascript" type="text/javascript">
// Read page's GET URL variables and return them as an associative array.
// NOTE: this code must go below the HTML id's above
function getUrlVars()
{
```

How to Create a Custom Redirect Thank-You Page for your Online Donation Form(s) that Automatically Populates the Donors First and the Donation Amount they Gave – Advanced Feature (using javascript)

```
var vars = [], hash;  
var hashes = window.location.href.slice(window.location.href.indexOf('?') + 1).split('&');  
for(var i = 0; i < hashes.length; i++)  
    {  
        hash = hashes[i].split('=');  
        vars.push(hash[0]);  
        vars[hash[0]] = hash[1];  
    }  
return vars;  
}  
//Global Param  
urlparms = getUrlVars();  
// Assign the value to the message block above  
document.getElementById('da').innerHTML = urlparms['da'];  
document.getElementById('fn').innerHTML = urlparms['fn'];  
</script>
```

The variables are **fn** and **da** for **first name** and **dollar amount**.
