Overview

This article provides an example get/post JavaScript form that you can use as a starting point to integrate with your **Trail Blazer** database. You'll need to replace the code in **red** with your specific **database name, custom text, images, and hyperlinks**.

You'll use a [JavaScript](#) programming function called 'Get' that allows you to collect information through something other than our [iFrames](#) utilizing **Trail Blazer's** API.

If you don't have vast programming knowledge or contract with a company that does, you should keep in mind that the form example below does not provide a lot of JavaScript validation so the person who does fill out the form could potentially make a lot of mistakes when entering things like date & phone information if their format isn't exactly what **Trail Blazer supports.*

 **Tip:** This can be useful if you want to:

- Make your forms mobile responsive for different screen sizes.
- Display only the fields you want to capture "i.e. gender, race, birthdate, name, address, political jurisdiction fields, contact info etc."
- Add styling and layout that blends well with the rest of your theme utilizing [CSS](#).

- Setup a [survey/poll](#) for any number of reasons.

IMPORTANT!

Technical support from Trail Blazer is NOT included on custom pages.

If you want to learn about our secure iFrame forms [click here](#) or [click here](#) to watch a video. It's also good to note that these custom signup forms DO NOT auto-merge records with existing data in your database as the iFrames do. [Click here](#) to watch a video on de-duping your database.

Example - All Available Fields

(Contact info/address/user text-decimal-date/radio buttons/attribute checkboxes)

[Click here](#) to view a live preview, feel free to test it out for the full experience of being re-directed and receiving the auto-responder email.

Screenshot 1 of 2:

Complete the form below

First Name*	
Last Name*	
Email*	
Street	
Apt. / Suite #	
City	
State/Province	
Zip Code*	
Cell Phone	(123) 456-7891
Home Phone	(123) 456-7891
Organization	
Occupation	
Job Title	
User Text 1	
User Text 2	
User Text 3	
User Text 4	
User Text 5	
User Text 6	
User Text 7	
User Text 8	
User Text 9	
User Text 10	
User Text 11	
User Text 12	
User Decimal 1	NUMBERS ONLY! <input type="button" value="v"/>
User Decimal 2	NUMBERS ONLY! <input type="button" value="v"/>
User Decimal 3	NUMBERS ONLY! <input type="button" value="v"/>
User Date 1	1/2/2014
User Date 2	1/2/2014
User Date 3	1/2/2014
Member #/Unique ID	

Screenshot Image 2 of 2:

Heading Goes Here

Select one of the radio buttons:

Radio 1
 Radio 2
 Radio 3

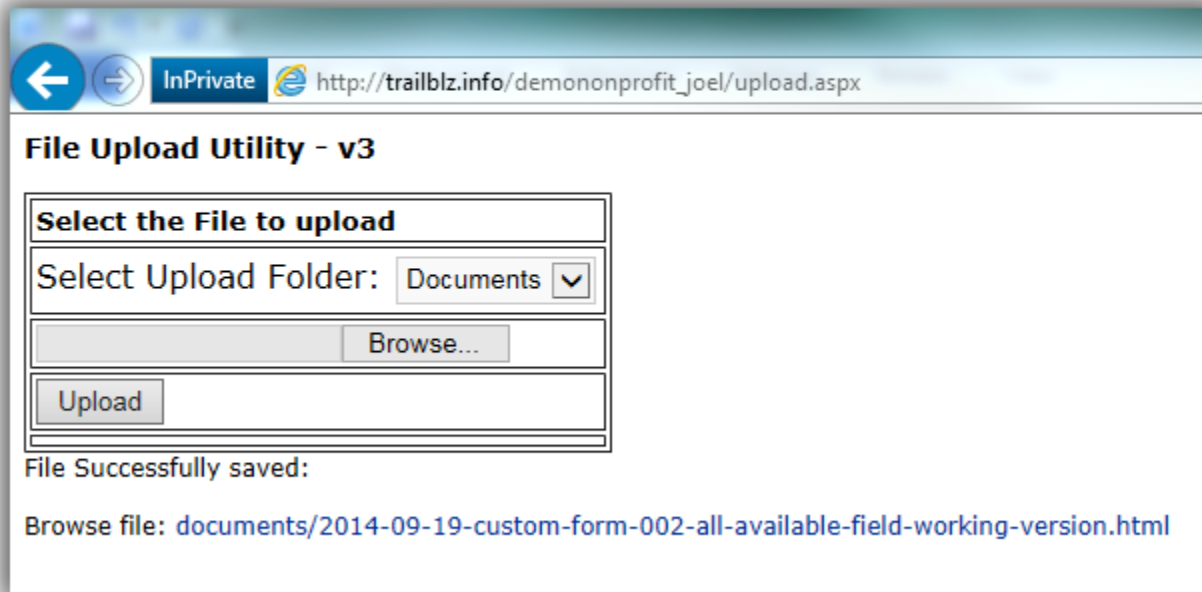

Check all that apply:

Attribute 01
 Attribute 02
 Attribute 03
 Attribute 04
 Attribute 05
 Attribute 06
 Attribute 07
 Attribute 08
 Attribute 09
 Attribute 10

NOTE: The code in red below will need to be replaced with your Database Name, redirect page URL, image sources, hyperlinks, attribute id's etc.

Copy & Paste all of the code below into your [text editor](#) and save as an .html document. Replace the appropriate code and upload the webpage to your hosting provider OR you can upload it as a document to your Trail Blazer Application Menu (www.trailblz.info/YourDataBaseName) – the image below shows how to upload a document to host it on our domain:

Trail Blazer Application Menu (Document Storage)
www.trailblz.info/YourDatabaseName/upload.aspx

If you decide you would like to hire us or another firm to design the page, the materials needed from you would be images, color scheme, fields/attributes/radio buttons you'd like to display. Hiring a web design/development firm is a good option many of our customers go with.
