

How to Setup your PayPal Payments Pro API Configuration to Work with Trail Blazer by Generating a Username, Password, and Signature

Author: Joel Kristenson

Last Updated: 2015-09-16

Overview

This article is for the customers who've decided to go with **PayPal Payments Pro** as the [merchant gateway](#) option to use with **Trail Blazer** for processing money (contributions, and event ticket/product sales).

It walks through the steps on how to generate your [PayPal Payments Pro API Username, Password, and Signature](#), and from there how to plug that information into your database.

Many of the steps this article references comes from PayPal's help resources in regards to the generation of the API credentials. The related resources at the bottom contain other relevant topics regarding the processing of money.

How to Setup your PayPal Payments Pro API Configuration to Work with Trail Blazer by Generating a Username, Password, and Signature

 **Tip:** Call or email **PayPal Payments Pro Live Support** if you have any trouble going through the steps related to your PayPal Payments Pro account (<https://www.paypal.com/us/webapps/helpcenter/helphub/home/>) or **1-888-818-3922**.

Steps to Request the API Credentials

IMPORTANT! You'll need appropriate [security clearance](#) to complete this task, if you don't currently have it, one of your database administrators will need to provide it.

First, you'll need to **apply** for your PayPal Payments Pro account to get it setup, and **activated** (*this will likely require that you provide a variety of personal and banking information to accomplish these steps*).

Apply by Phone: <https://www.paypal.com/us/webapps/mpp/pro-telesales-signup>

Apply Online: <https://www.paypal.com/us/webapps/mpp/pro-telesales-signup>

How to Setup your PayPal Payments Pro API Configuration to Work with Trail Blazer by Generating a Username, Password, and Signature

1. Log in to PayPal.com

You must have a **PayPal Business** account. The url to log in is located at <https://www.paypal.com>

2. Navigate to the API Access page

Click the profile (person) icon in the top right and select **Profile and Settings** from the drop-down menu. Then navigate to **My Selling Tools > API Access** and click **Update**.

NOTE: if you do not see the profile (person) icon in the top right, navigate to the API Access page by clicking **My Account > Profile > My Selling Tools > API Access**

3. Generate the Certificate Set

1. Click **Request API Credentials** on the **API Access** page:

Option 2 - Request API credentials to create your own API username and password.

This option applies to:

- Custom websites and online stores
- Pre-integrated shopping carts running on your own server

[Request API credentials](#)

Note: If you've already generated a set of API credentials, you'll have to delete your existing set before you can generate a new set of credentials.

2. Select **Request API signature** and click **Agree and Submit** to generate a set of Signature credentials.

Here's an example showing a set of Signature credentials (for [Certificate](#) credentials, see the section below):

View or Remove API Signature

[Back to My Profile](#)

Developers: Do not share your credential information with anyone. Store in a secure location with limited access.

For preconfigured shopping carts: Copy and paste the API username, password, and signature into your shopping cart configuration or administration screen.

For building custom shopping carts: Store the following credential information in a secure location with limited access.

Credential	API Signature
API Username	kriech_api1.ebay.com
API Password	R2CV5XCLEYEMQ7RH
Signature	ACxwNDtvkO2nsXs2fa4ldAjRq98TA204gsd2ODrvR4mTZY.e.nYU15Sh
Request Date	Mar 29, 2013 08:48:34 PDT

Once that's complete, navigate to the **Website Configuration** screen, and click the [blue](#) hyperlink in the upper-right to refresh your web settings.

How to Setup your PayPal Payments Pro API Configuration to Work with Trail Blazer by Generating a Username, Password, and Signature

The screenshot shows the TrailBlazer settings interface. On the left is the 'Application Menu' with a tree view. Under 'System Manager', 'Settings' is expanded, and 'Website Configuration' is highlighted with a red arrow and the number '1'. The main content area shows the 'Iframe Wizard' settings for 'Kathryn For Congress'. A red box highlights the 'Refresh web pages' section, which contains a link: 'Click here to refresh your web pages using updated specifications.' This link is also marked with a red '2'. Below this, there are tabs for 'Calendar Events', 'Component', 'Donations', 'Signup Email', 'Signup Short', 'Signup Without Attributes', 'Signup Attributes', and 'Signup Post'. The 'Donations' tab is active, showing various configuration options like 'Is Federal (Employer / Occupation) *Required', 'Is Email Address *Required', 'Disable Captcha', 'Include Comments', etc. A text area at the bottom right contains HTML code for a disclaimer.
