Overview

This article walks through the steps to use the new (*released Oct. 2015*) **poll watching feature** to flag voters, using your mobile device who are voting in your current election.

The feature is bundled in with the rest of the [Mobile Base Camp](#) web app tools and can be accessed with an mobile device that has internet connectivity, and a web browser.

 **Tip:** To save time you can create a **single** database [user account](#) with very limited security access for just poll watching. Then distribute the login credentials between all of your poll watchers. *This requires appropriate **security clearance** to setup new users (normally not a good practice with your database but in this case if you limit the access correctly it makes the process much more efficient).*

Prerequisites

IMPORTANT: Prior to using this feature you need to:

- Contact our support team at (support@trailblz.com) or (1-866-909-8700) with the request to set you up with this feature from our end.
- Let us know which **election** in your database you need activated.
- If you only require certain **precincts** to be listed in the poll watching drop-down list, we'll also need a list of those specific ones (this can be especially common with a very large database).

We will activate the feature on our end, and also make sure that your precinct data is up-to-date, and that the naming convention of your precincts is consistent.

 **Tip:** It's a good idea to request this sooner than later so that all of your volunteers have time to learn how to log in via their mobile device, and how the results can be utilized with queries, and pivot reports once polling commences.

Steps

Navigate to your **Elections** list, verify that the election you're polling for is created (*otherwise [create a new one](#)*), and then contact us with the name of the election you need activated. *In my example I used my **Primary 2016** election.*

If you only want certain **precincts** within your database to display in the drop-down on Mobile Base Camp you'll need to send us that list as well.
This can be altered election by election on our end.

Your current list of precincts can be viewed by following **Application Menu > System Manager > Lists > Precincts:**

Precinct list, where you can select which ones you need enabled for poll watching, otherwise we'll enable all that are in the database.

The screenshot shows the TrailBlazer application interface. On the left is a navigation menu with categories like Polling, Communications, Financial, Disclosure, System Manager, and Lists. The 'Precincts' item under 'Lists' is highlighted with a red arrow. The main window displays the 'Precinct List' screen, which includes a search bar (highlighted with a red box), a form for adding or editing precinct details, and a table of existing precincts. The table has columns for 'Incl', 'Precinct ID', 'Precinct Name', 'Precinct Code', 'Poll Location', 'Poll Street', 'Poll Street 2', 'Poll City', 'Poll State', 'Poll Zip Code', 'Use Count', and 'Poll Watch Enabled'. The 'Poll Watch Enabled' column contains checkboxes for each precinct.

Incl	Precinct ID	Precinct Name	Precinct Code	Poll Location	Poll Street	Poll Street 2	Poll City	Poll State	Poll Zip Code	Use Count	Poll Watch Enabled
<input checked="" type="checkbox"/>	1880	ACOMA TOWNSHIP	0005							3	<input type="checkbox"/>
<input checked="" type="checkbox"/>	1645	ACTON TWP.	0005							2	<input type="checkbox"/>
<input checked="" type="checkbox"/>	2088	ADA W-1	0005							1	<input type="checkbox"/>
<input checked="" type="checkbox"/>	2202	ADA W-2	0010							1	<input type="checkbox"/>
<input checked="" type="checkbox"/>	2267	ADAMS	0005							1	<input type="checkbox"/>
<input checked="" type="checkbox"/>	1970	ADAMS TWP.	0010							3	<input type="checkbox"/>
<input checked="" type="checkbox"/>	612	ADRIAN	0005							3	<input type="checkbox"/>
<input checked="" type="checkbox"/>	1331	AFTON W-1 P-1	0005							1	<input type="checkbox"/>
<input checked="" type="checkbox"/>	870	AITKIN	0005							2	<input type="checkbox"/>
<input checked="" type="checkbox"/>	2277	AKELEY	0005							2	<input type="checkbox"/>
<input checked="" type="checkbox"/>	1098	AKELEY TWP.	0010							2	<input type="checkbox"/>
<input checked="" type="checkbox"/>	1034	ALBANY	0005							3	<input type="checkbox"/>
<input checked="" type="checkbox"/>	1411	ALBERT LEA W-1 P-1	0005							1	<input type="checkbox"/>

If you don't want to go through and select which precincts to include in the poll watching app we'll enable all that are in the database.

Once these steps are finished, we'll update you that it's ready (*this can take anywhere from a couple hours to a few days depending on the size of the database*).

As soon as we give you the go-ahead you can have your poll watchers log into Mobile Base Camp at www.trailblz.info/YourDatabaseName/Mobi - in my example I logged in at http://www.trailblz.info/democampaign_joel/mobi.

(Your secure login is hosted at www.trailblz.info/YourDatabaseName/mobi)

Browser address bar: <https://trailblz.info/democamp>

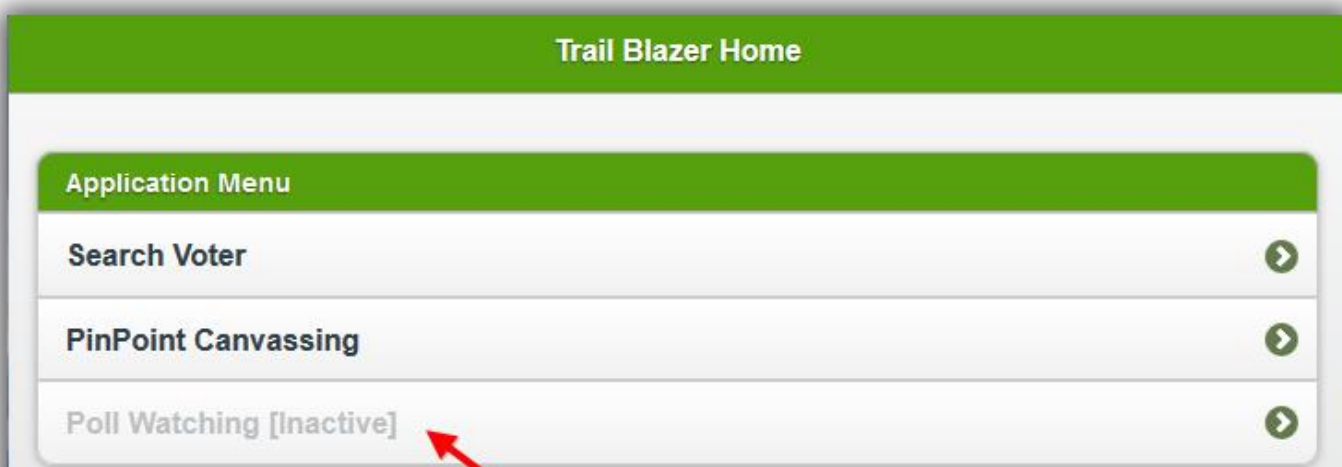

TRAILBLAZER™
Mobile Base Camp

Username:

Password:

 Login BaseCamp

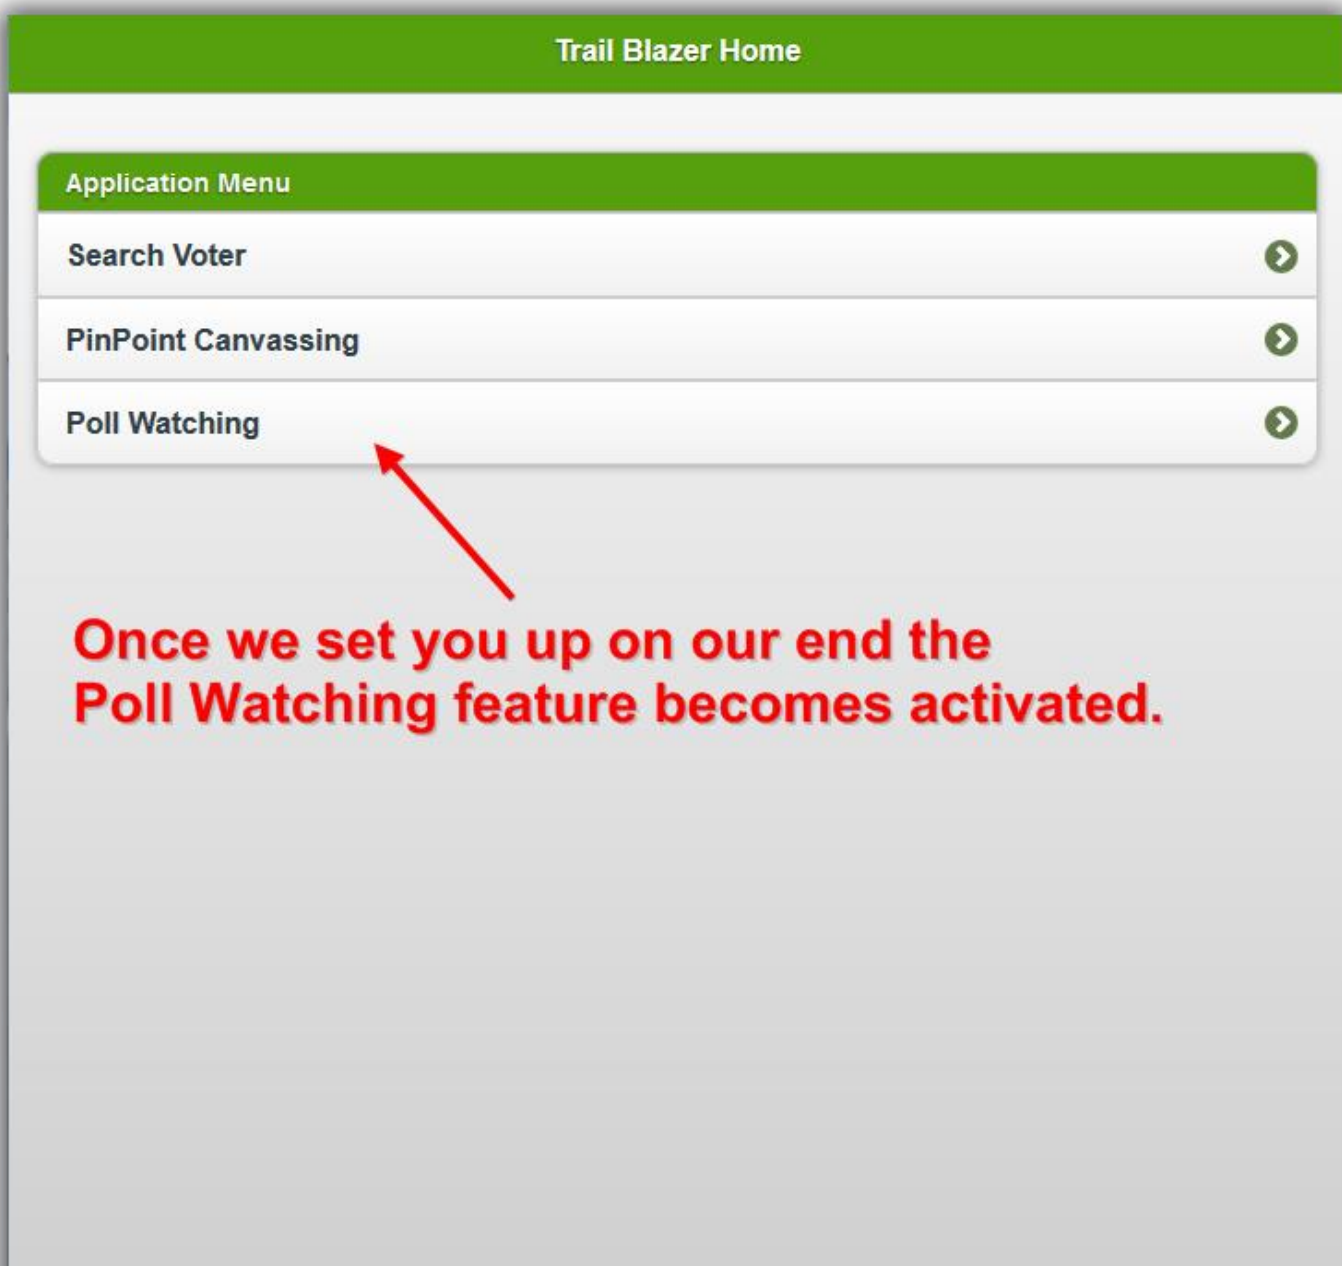

This is what it looks like *prior* to poll watching being activated:

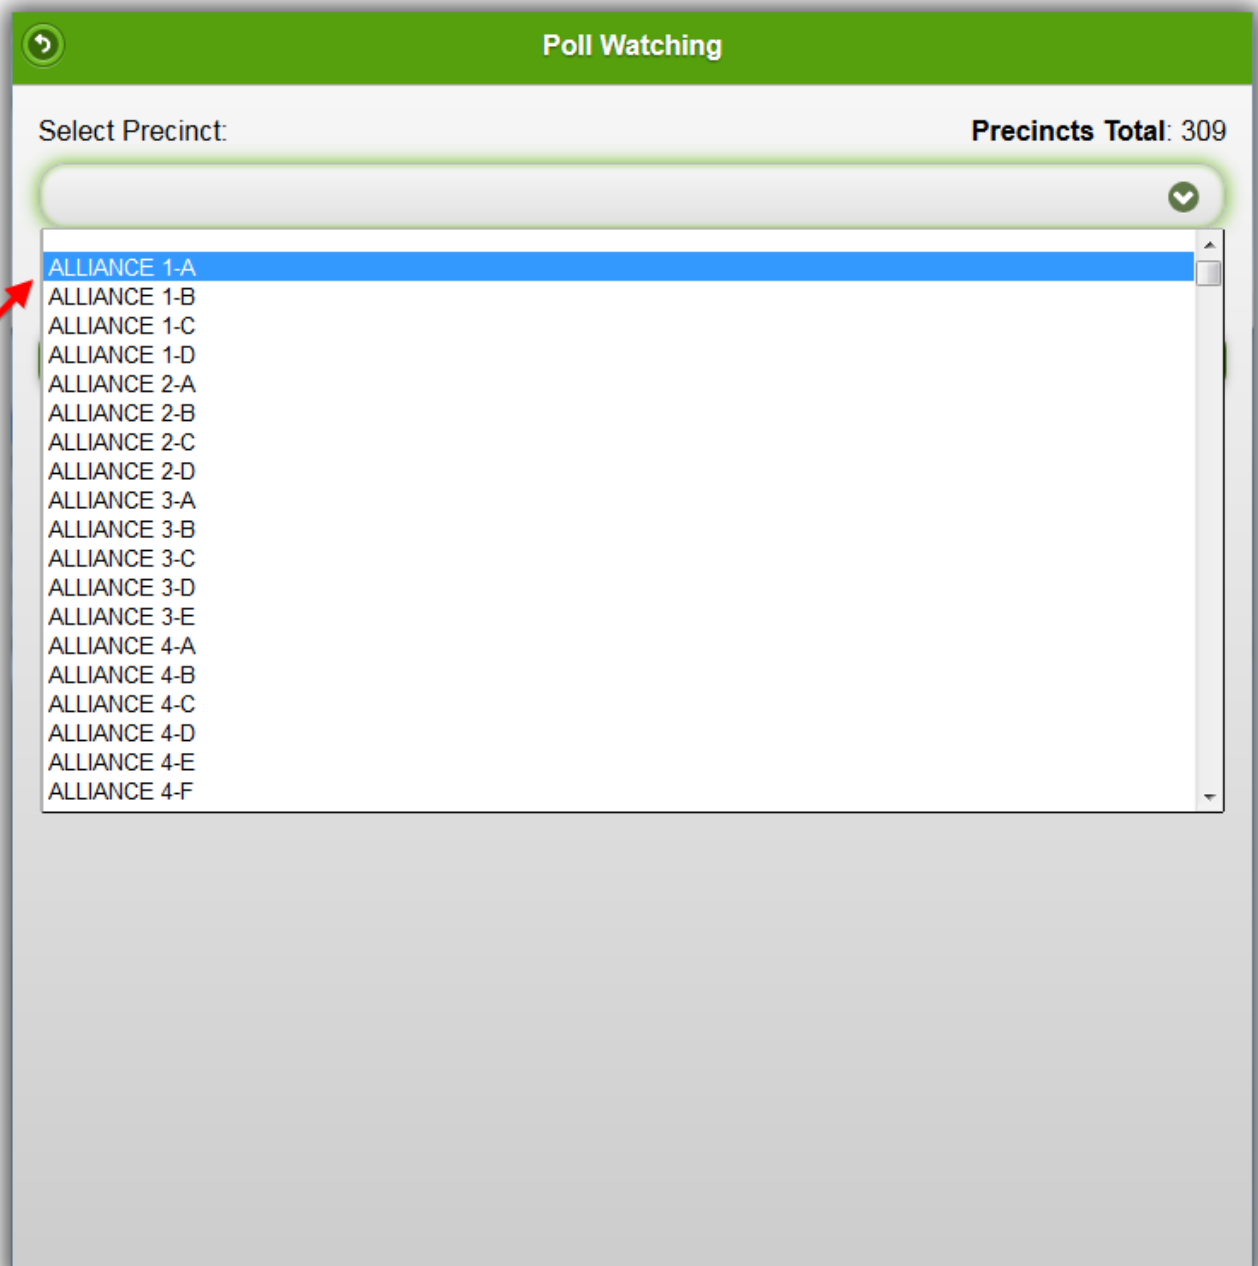

This feature of Mobile Base Camp will display as [Inactive] until you put in the request to our support department that we enable the election for 'Poll Watching'.

**Email: support@trailblz.com
Phone: 1-866-909-8700**

Once we complete the steps above it will look like this:

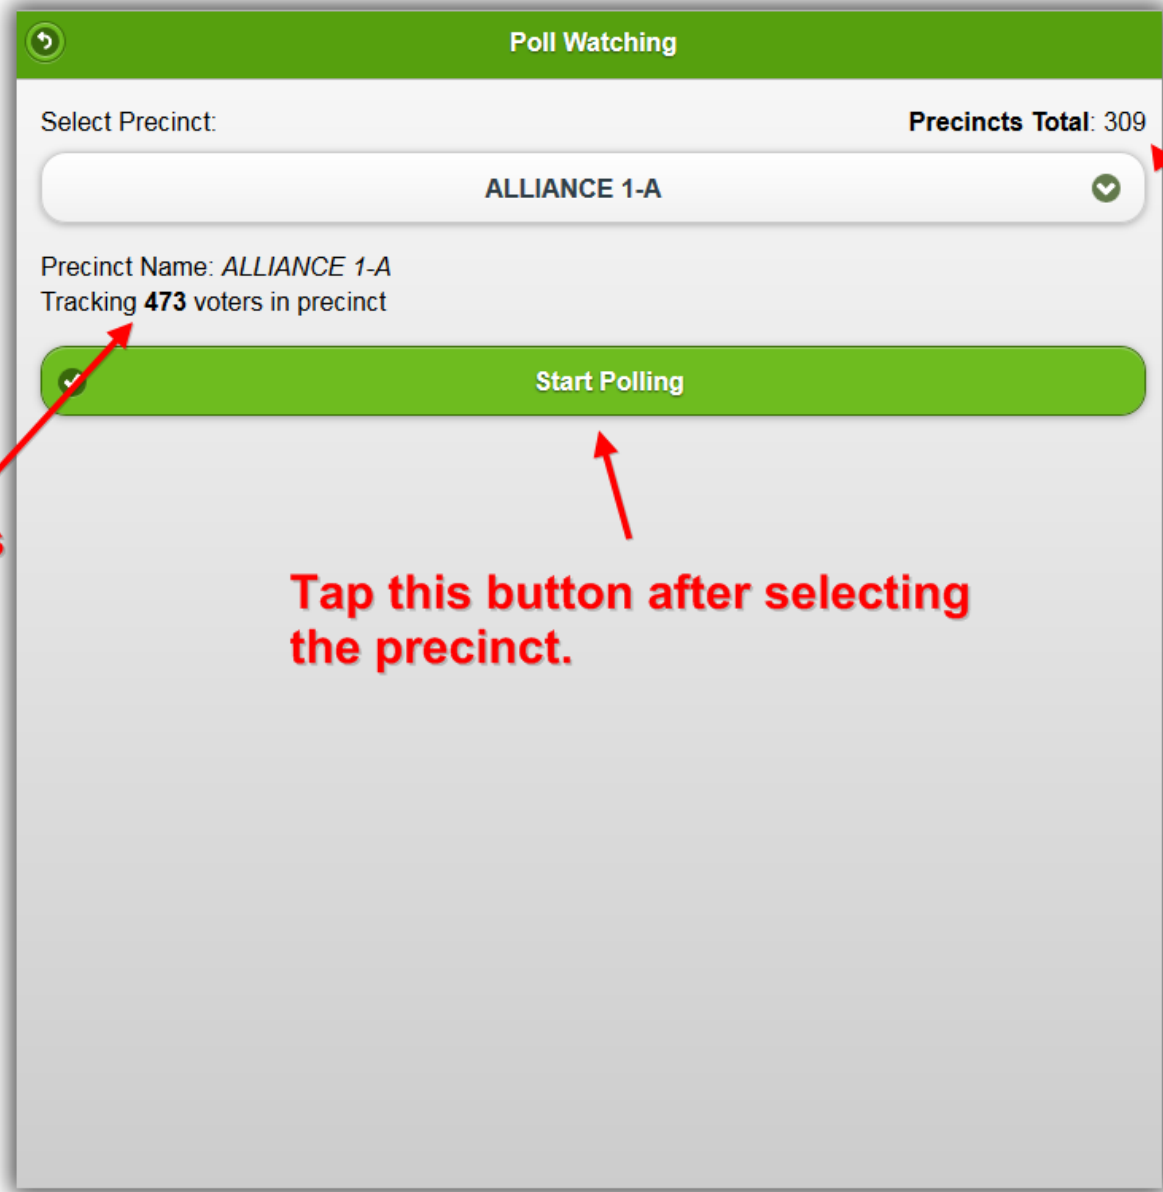

Click on the **[Poll Watching]** button, and select the **precinct** from the drop-down where you will be stationed. *In my example I chose the first one in my list "Alliance 1-A".*

Select the precinct from the drop-down where you'll be stationed.

Tap on the **[Start Polling]** button to proceed.

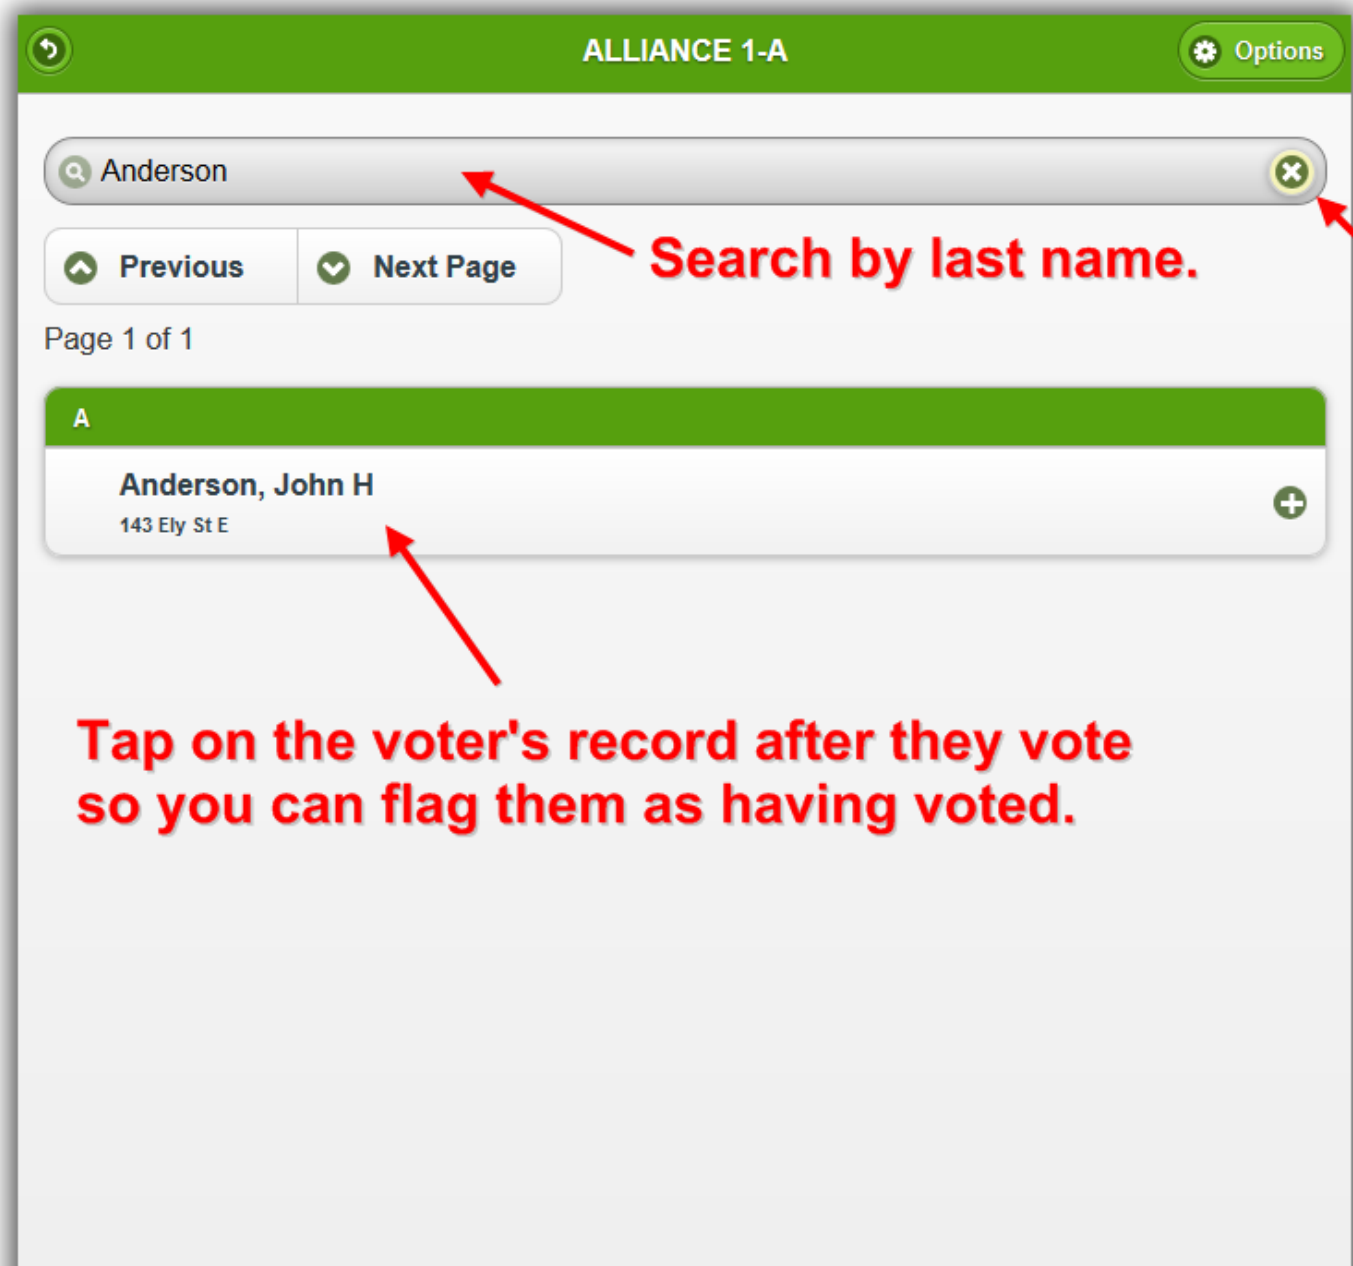

Number of voters to poll in this precinct.

Tap this button after selecting the precinct.

Total amount of precincts enabled for poll watching.

You can search by **Last Name** as voters finish voting, then tap on their record to open it. *In my example I searched this precinct for “Anderson” and selected “John H Anderson”.*

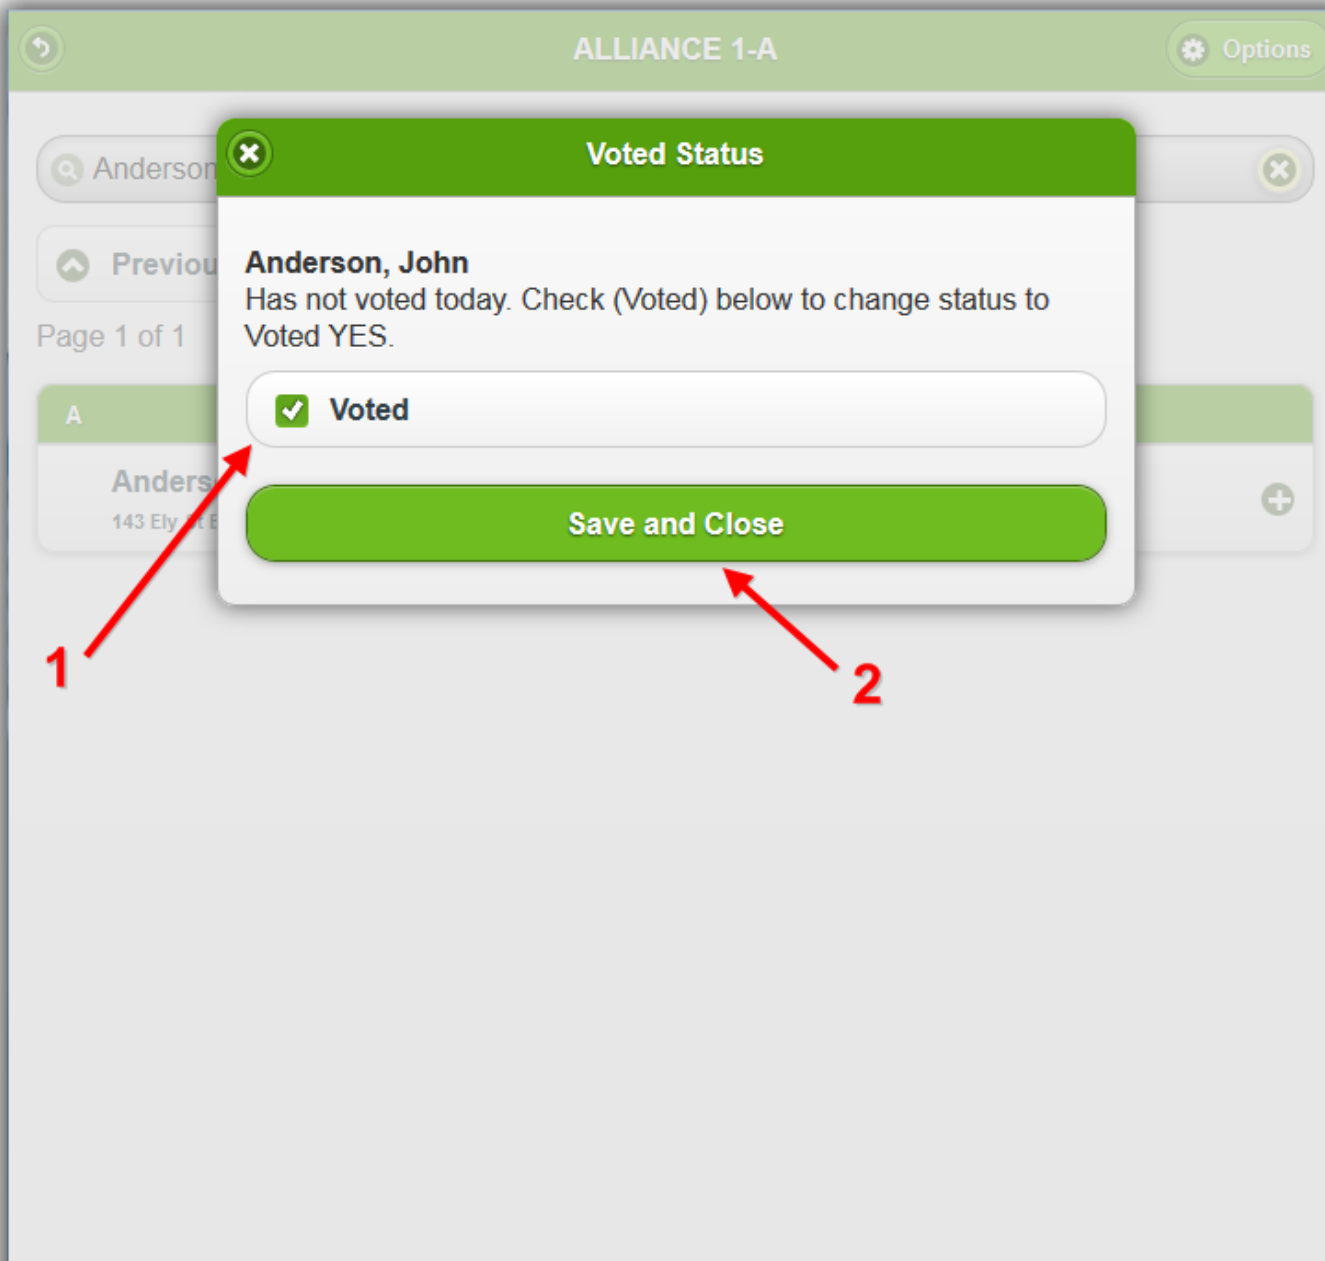

Search by last name.

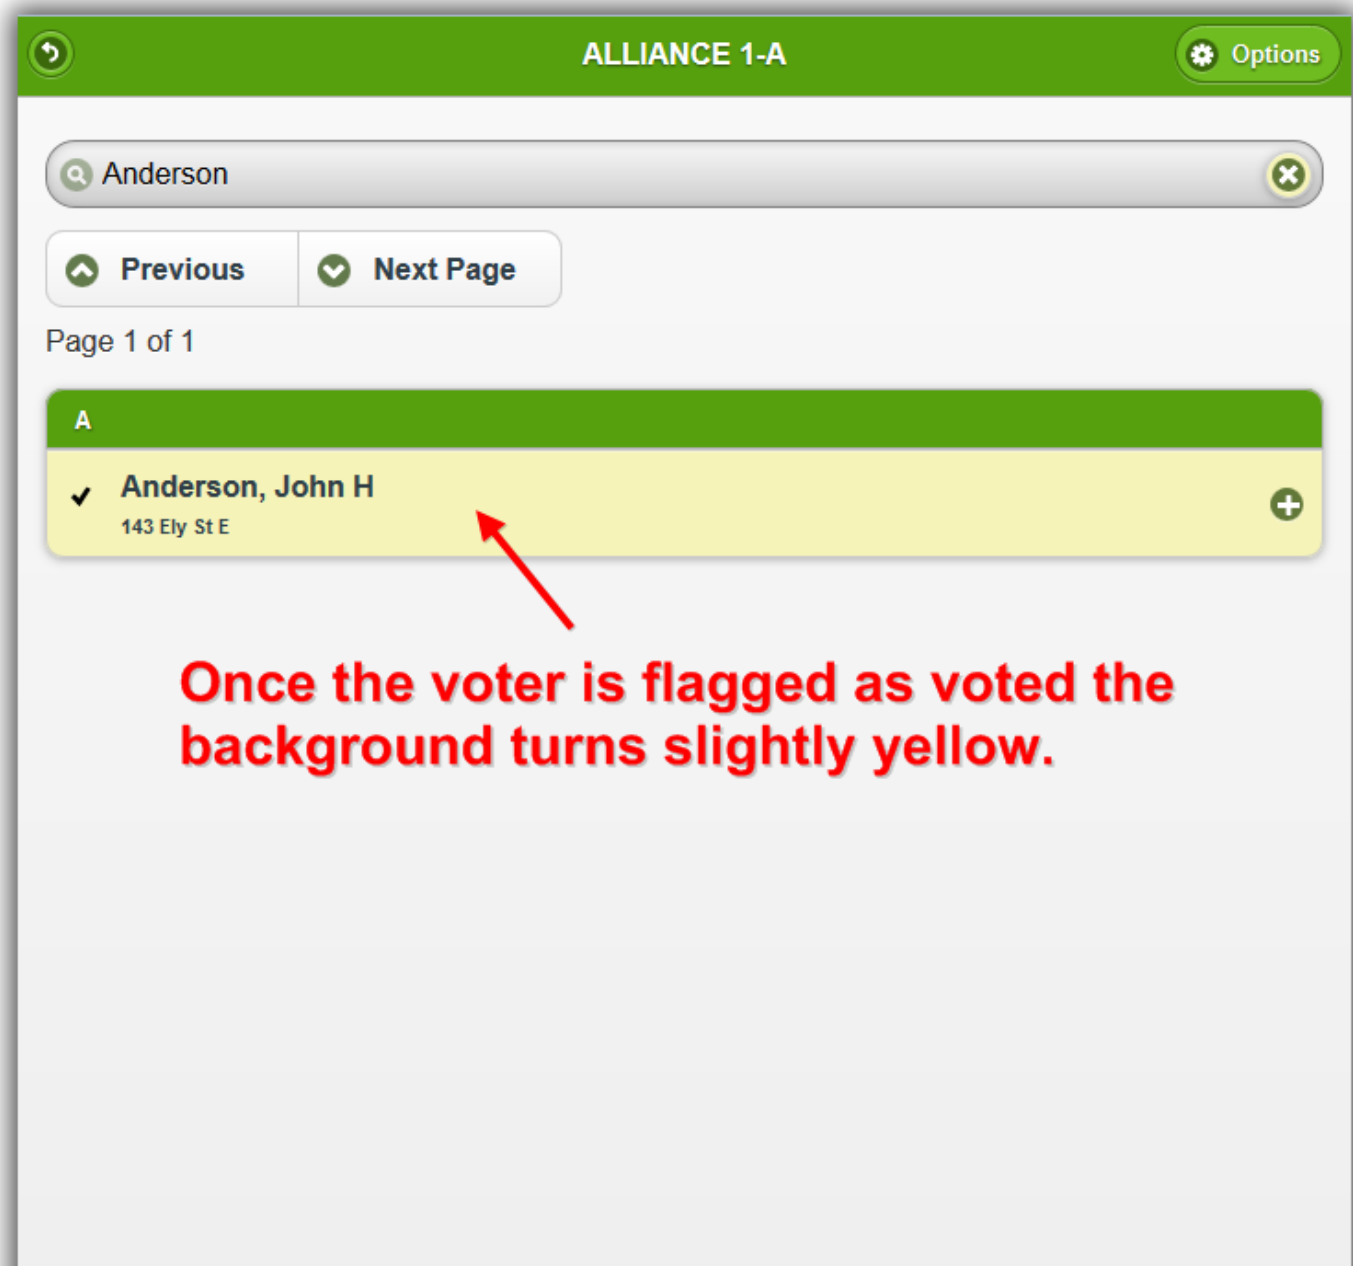

Clear search.

Tap on the voter's record after they vote so you can flag them as having voted.

Check the box for **Voted**, and then tap on **[Save and Close]** to finish. *If you make a mistake you can open the voter's record back up and uncheck that box.*

Once the voter is marked as 'voted' the background of the row in their record will turn slightly yellow. *My example is below.*

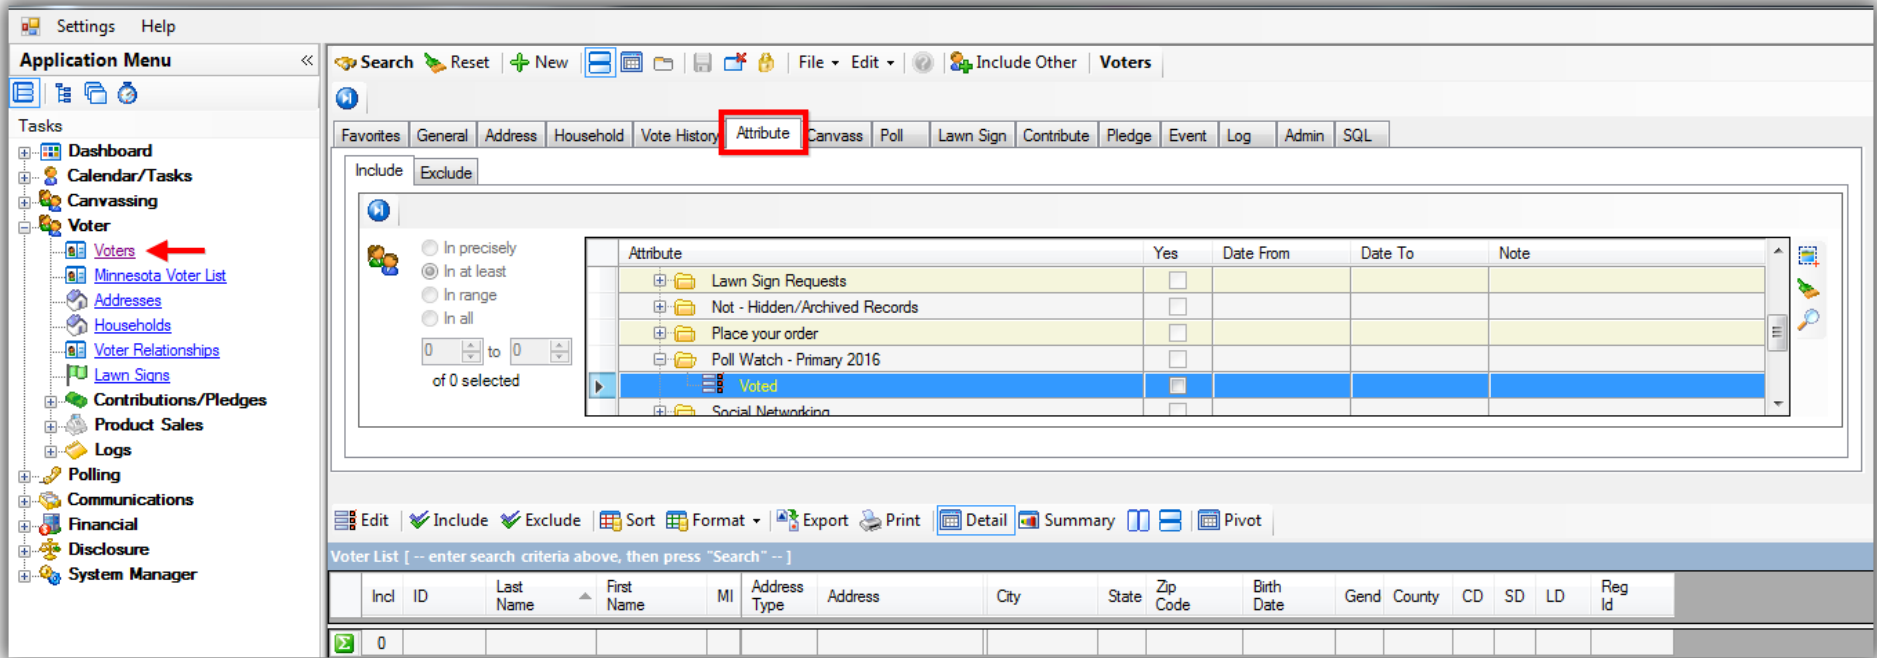

Once the voter is flagged as voted the background turns slightly yellow.

Repeat these steps until the polling places close. The next steps show how to utilize the data that's being collected. *These final steps assume you have access to your database and not just web passed polling access.*

 **Tip:** To use the Mobile Base Camp web app more effectively take a look at [this article](#). It will show you how to configure your device with shortcuts to quick-launch the 'app', and how to keep the device screen on longer so you don't need to log in over-and-over.

In your database navigate to the **Voters** list > **Attribute** tab.

There will be a new attribute folder called **“Poll Watch – Name of Election”** with a new attribute item called **“Voted”**. In my example the attribute item is called **“Poll Watch – Primary 2016”**.

This attribute folder and item get created automatically once the polling feature is activated for an election.

To see everyone who's voted in the current election check the attribute box in the 'Yes' column, and then click **[Search]**. *In my example it returned 10 voter records who had so far voted in my mock election.*

10

This basically sums up the steps to setup poll watching, using the mobile app, and run queries by the results as they're collected. Continue reading to learn how to build a **pivot** report off the data you collect - for instance you can get quick totals of voters by precinct, and getting even more advanced by adding in their party types.

Steps to Build a Pivot Summary Report that Details Voter Counts by Precinct

In the **Voters** list search for everyone who has voted in your current election, you'll do this by using the new attribute detailed in the steps above. *In my example it returned **3,157** voters for my mock election.*

Search and load all voters who have voted in your current election.

The screenshot shows the TrailBlazer application interface. On the left is a navigation sidebar with categories like Dashboard, Canvassing, Voter, and Polling. The 'Voters' option is highlighted with a red arrow and the number '1'. At the top, the 'Search' button is highlighted with a red box and the number '3'. Below the search bar, a filter table is shown with the 'Voted' checkbox selected, highlighted by a red arrow and the number '2'. Below the filter table, a table of voters is displayed with the header 'Voters [3157 records found]' highlighted by a red box.

Under the **Voter** 'table' select **Party** from the list of columns.

In the lower-left under the **Joined Tables** highlight the **Precinct** table, and then select **Precinct Name** from the list of columns on the right.

Click **[OK]** once the columns for Precinct Name and Party have been selected.

The new columns will display on the far right of the grid.

The screenshot shows the TrailBlazer 'Voters' interface. At the top, there's a menu bar with 'File', 'Edit', and 'Include Other'. Below that, a navigation bar includes 'Household', 'Vote History', 'Attribute', 'Canvass', 'Poll', 'Lawn Sign', 'Contribute', 'Pledge', 'Event', 'Log', 'Admin', and 'SQL'. A filter pane on the left lists attributes like 'Lawn Sign Requests', 'Not - Hidden/Archived Records', 'Place your order', 'Poll Watch - Primary 2016', 'Voted', and 'Social Networking'. The 'Voted' attribute is checked. Below the filter pane, a toolbar contains 'Sort', 'Format', 'Export', 'Print', 'Detail', 'Summary', and 'Pivot'. The main data table has columns: First Name, MI, Address Type, Address, Address Line 2, City, State, Zip Code, Birth Date, Gender, County, CD, SD, LD, Reg Id, Party, and Precinct Name. The 'Party' and 'Precinct Name' columns are highlighted with a red box.

To get total voters by precinct with a breakdown of party, start by clicking the **[Pivot]** button.

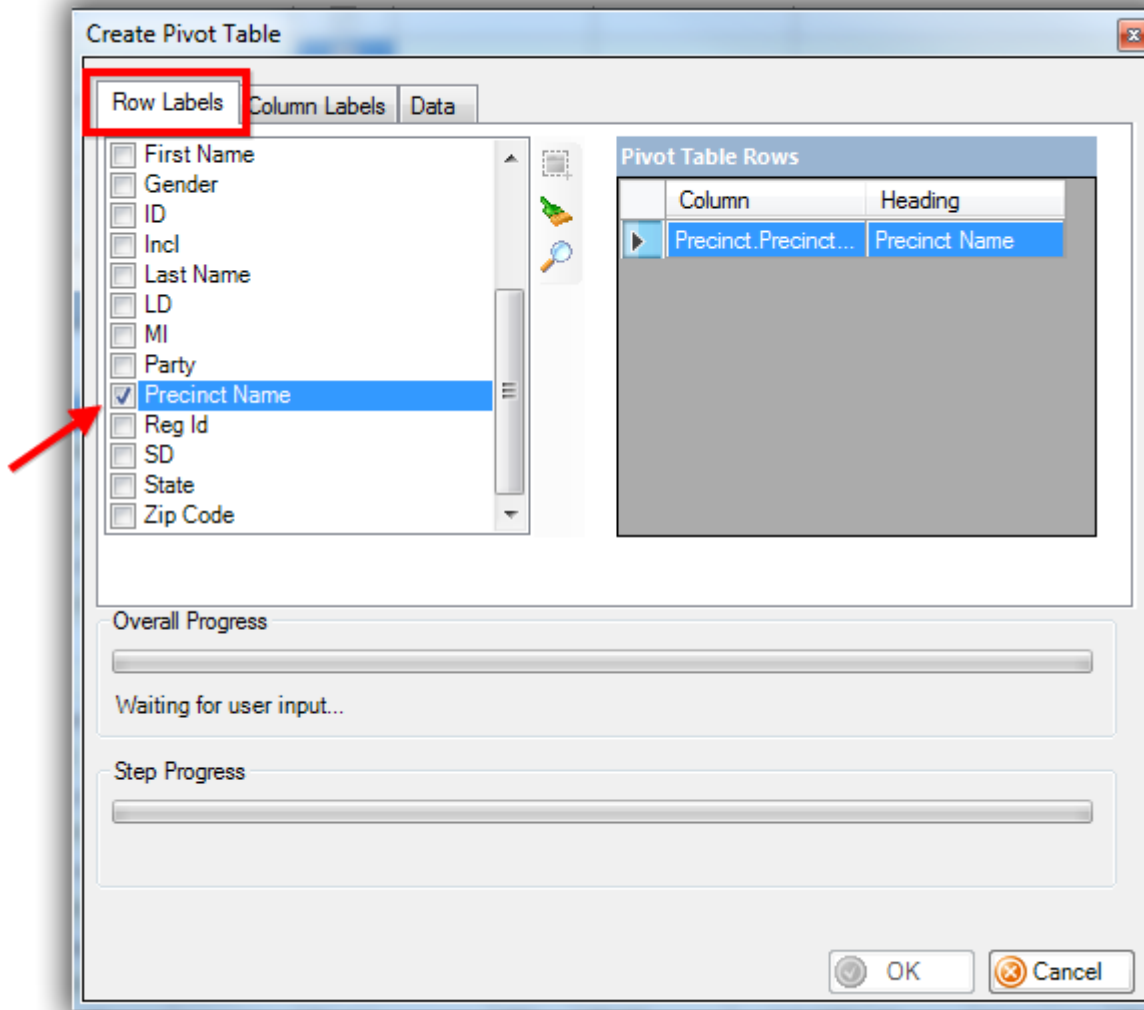

The screenshot shows the TrailBlazer software interface. At the top, there is a search bar and navigation icons. Below that, a menu bar includes 'Favorites', 'General', 'Address', 'Household', 'Vote History', 'Attribute', 'Canvass', 'Poll', 'Lawn Sign', 'Contribute', 'Pledge', 'Event', 'Log', 'Admin', and 'SQL'. The 'Attribute' tab is selected, showing a list of attributes with checkboxes for 'Yes', 'Date From', 'Date To', and 'Note'. The 'Voted' attribute is checked. Below the attribute list, there is a toolbar with buttons for 'Edit', 'Include', 'Exclude', 'Sort', 'Format', 'Export', 'Print', 'Detail', 'Summary', and 'Pivot'. The 'Pivot' button is highlighted with a red box. Below the toolbar, a status bar indicates 'Voters [3157 records found]'. The main data table has columns for 'Incl', 'ID', 'Last Name', 'First Name', 'MI', 'Address Type', 'Address', 'Address Line 2', 'City', 'Birth Date', and 'Gender'. A 'Create pivot table.' button is visible above the table.

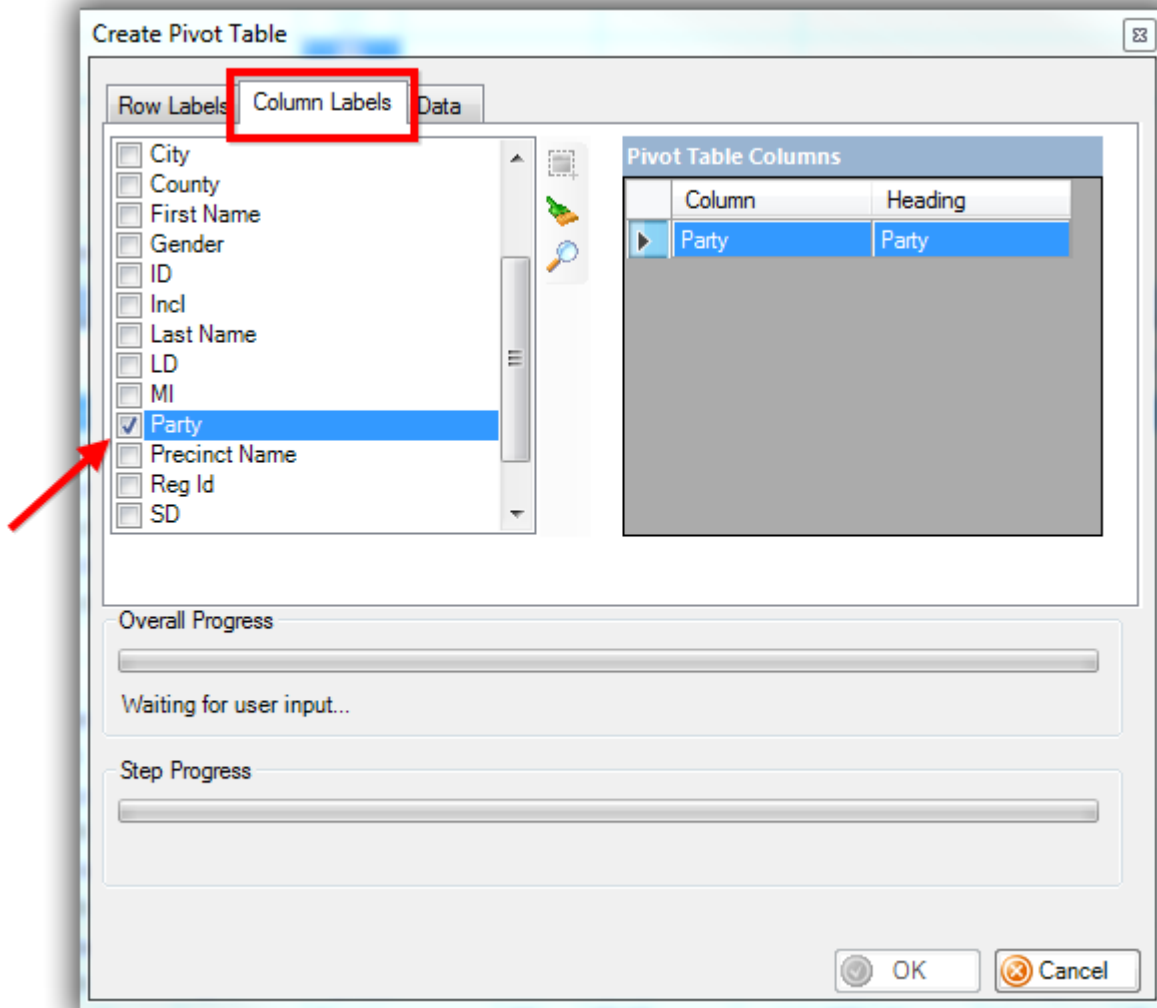

Attribute	Yes	Date From	Date To	Note
Lawn Sign Requests	<input type="checkbox"/>			
Not - Hidden/Archived Records	<input type="checkbox"/>			
Place your order	<input type="checkbox"/>			
Poll Watch - Primary 2016	<input checked="" type="checkbox"/>			
Voted	<input checked="" type="checkbox"/>			
Social Networking	<input type="checkbox"/>			

Incl	ID	Last Name	First Name	MI	Address Type	Address	Address Line 2	City	Birth Date	Gender
<input checked="" type="checkbox"/>	7	Aalegaard	Wendy	Jo		3040 Sumter Ave N	Apt 102	Crystal MN	55427-2757	1/1/1977 F
<input checked="" type="checkbox"/>	100	Achterling	Scott	David		11281 Osage St NW		Coon Rapids MN	55433	1/1/1979 M

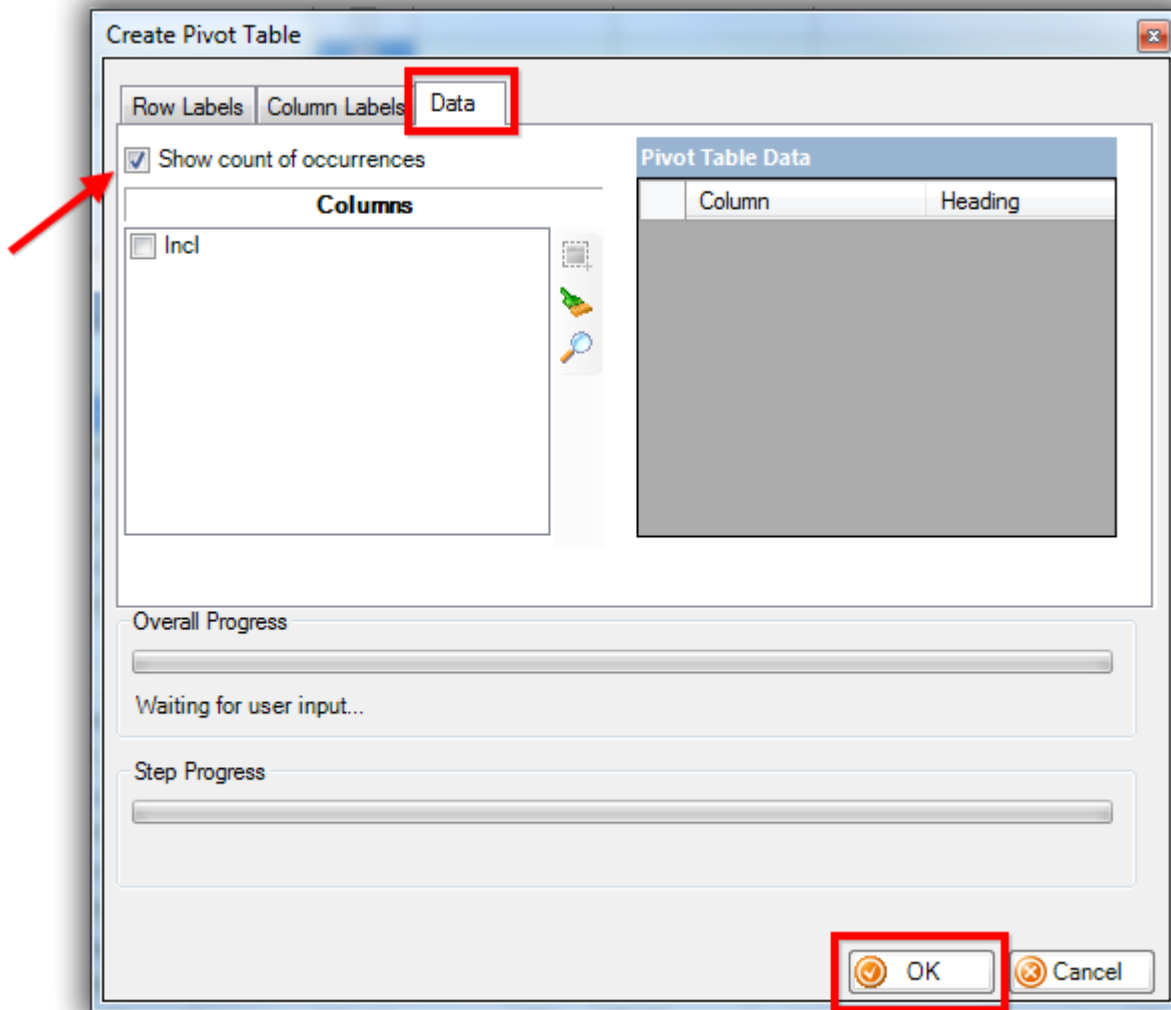

Under the **Row Labels** tab select **Precinct Name**.

Under the **Column Labels** tab click **Party**.

Under the **Data** tab click **Show count of occurrences** and then click **[OK]**.

Your final pivot report will now display counts of voters, by party type, for each of the precincts you're polling. *My example is below.*

Sort Format Export Print Chart

Voter Count by Precinct Name by Party

Incl	Precinct Name	COUNT (*)	COUNT (*)	COUNT (*)	COUNT (*)	COUNT (*)	COUNT (*)
			DEM	IND	OTH	REP	
<input checked="" type="checkbox"/>		1,351	3	556	3	305	484
